

# Setting Up Application Environment

## Docker Installation

### Step 1:

Go the official Docker website: <https://docs.docker.com/desktop/install/windows-install/>

### Step 2:

Click that button (Docker Desktop for Windows) and download will start and it takes few minutes to complete.

### Step 3:

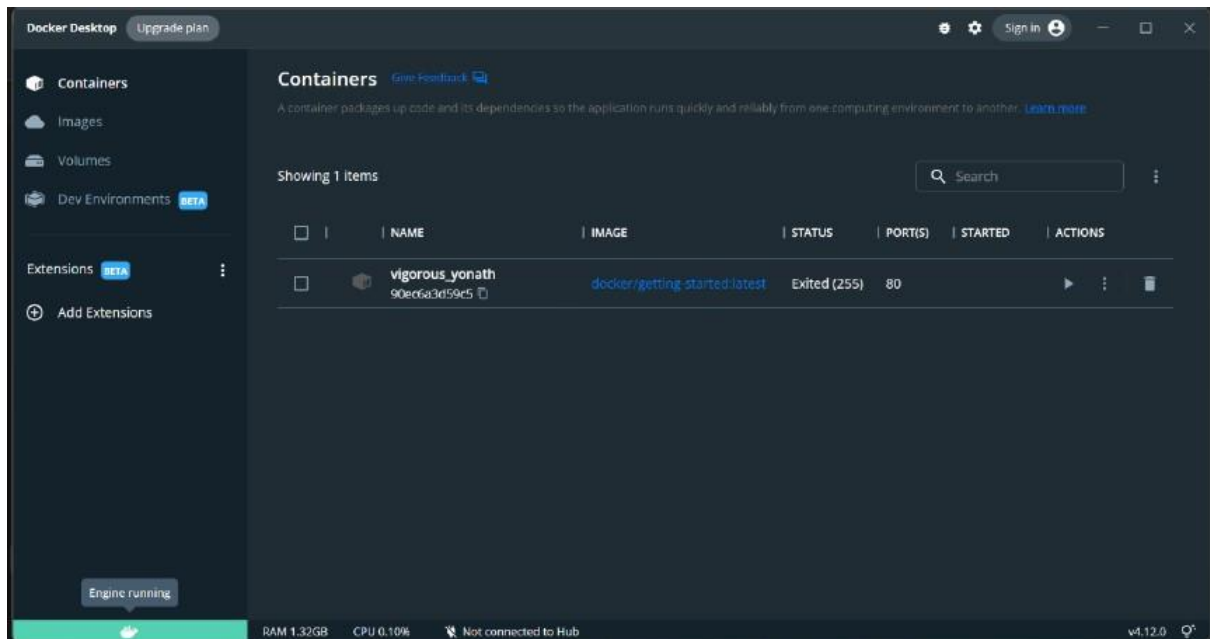

Go to downloads in browser (or) type ctrl + J, it will navigate to download page and double-click the particular docker file.

### Step 4:

Now Installation is complete. This icon was added in your desktop. Double-click the icon to start the docker app, you can register and login that app to access those credentials.

### Step 5:

Docker will start correctly, the left bottom side was shown in green color, docker will show the status of docker app working successfully.

### Step 6:

Finally, the Docker is installed successfully.
